Bioengineered Statement

We gathered the required information necessary to determine which manufactured products contain ingredients that may be sourced from a bioengineered material. It should be noted, formulation and ingredient order of predominance impact the decision-making process as does the recognized threshold that allows for the inadvertent or technically unavoidable presence of a bioengineered substance – up to 5% in each ingredient. In addition, highly refined products are exempt from the Standard disclosure.

We concluded that any School Foodservice item currently manufactured that has a bioengineered ingredient will be identified with the following statement; *Contains a bioengineered food ingredient*. This item does not.

PFAS Statement

Per DuPont Teijim Films™ regarding MYLAR® and MELINEX® all gauges, as manufactured in the United States of America Per or Poly Fluorinated Compounds. We do not intentionally add Perfluorinated or Polyfluorinated Compounds, or Fluoropolymer substances to the formulation.
